2024

Highlights for the week

Maths and English: In Maths we are continuing our work looking at 2D and 3D shapes. In English we are continuing our story on the three little pigs, this week we played with play hay and brick houses to explore the pigs houses they built.

Messages from Mrs Dixon:

Thank you to everyone so far who has provided a bottle or recycling items to make a pull along toy in DT and a musical instrument in Science this term. We no longer need bottles but would very much appreciate clean cardboard boxes and tubes to make a musical instrument when we explore sound in science.

To help with our PSD circle time topics for next week, if you are able, please can you send in any family photos that can be stuck down onto worksheets, decorated and spoken about with the children, these will then go into individual child's subject folders, thank you 😊

Class Awards:

Head teachers awards

Eddie: for correctly identifying his friends to pass the beanbag during PSD across the circle.

Rafay: for getting all names of adults in Birch class correct and using them to attract an adults attention.

For being safe at school: Adam: for walking away from a friend when he was upset instead of using behaviours.

Topic: This week we have started to look at DT and making our pull along toy, we have started doing our initial designs ready to start make them by the end of next weeks topic lessons. During free play we have been looking at construction play toys, and building towers with Lego.

In music we have moved onto a new instrument, looking at chime bars and learning to play twinkle twinkle little star. We are learning by watching, exploring and using the song from a nursery rhyme video and playing along to our own beats.
